## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-56 and 59-110, drawn to an etching method, classified in class 216, subclass 41.
- II. Claims 57, 58, 111 and 112, drawn to a nozzle tool, classified in class 156, subclass 345.11.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product such as a nozzle tool with a single application means, and the product as claimed can be used in a materially different process of using that product such as coating a workpiece.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Alan Wagner on 4/15/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1763

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-56 and 59-110 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant presents an unreasonable number of claims in view of the nature and scope of the invention thus being repetitious and causing confusion. It is acknowledged that the independent claims differ from each other somewhat, but many of the dependent claims are identical to others that have been presented. The examiner acknowledges the right of applicant to reasonable latitude in stating their claims. Such latitude should not be extended to sanction that degree of repetition and multiplicity, which beclouds definition in a maze of confusion. The rule of reason is practiced and applied on the basis of circumstances. In this case it would appear that a total of 36 claims with 4 independent claims could adequately cover the invention, i.e. 4 independent claims with 32 dependent claims. To be responsive, if applicant elects Group I (Claims 1-56 and 59-110) applicant should also elect up to 4 independent claims and up to 32 dependent claims from Group I. See MPEP 2173.05(n).

A telephone call was made to Alan Wagner on 4/15/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
